Change Description:

- To ensure compliance with Radio Equipment Directive (RED) cybersecurity requirements, the CANlink mobile 3600 PLUS+1 devices will be delivered with a new firmware version 4.0.0. In particular, this version will have stricter requirements when the device is configured as a Wi-Fi access point. The new firmware revision including the release notes is available for download in our [Download Center](#)
- The CANlink mobile 3600 devices will no longer support local device application firmware updates over the USB interface. In the Proemion Firmware Programmer this option will not be available anymore.
- The CANlink mobile 3600 devices will be delivered with a new bootloader version 10.0. This version will delete user configuration and all log data when the device firmware is updated locally over the CAN network and the device is in bootloader mode (the Firmware Programmer will display a warning before executing an update operation that results in data deletion).
- The CANlink mobile 3600 devices will be delivered with the latest manufacturer-provided firmware for relevant hardware modules such as the cellular module.
- The new firmware revision is already available in our DataPlatform [Firmware Management](#). Please use this convenient feature to update the devices in your fleet. Please consider our [Safe Remote Updates Guideline](#) when planning the update campaign.
- Proemion urgently recommends that you always update your devices to the latest released firmware version. Failure to update firmware may result in elevated errors, higher data consumption or even loss of connectivity for which Proemion is not obligated to provide technical support or warranty. If you have any problems or questions regarding the update, please contact our support team at <https://support.proemion.com>.
- A new CE declaration of conformity will be issued and published at [Declaration of Conformity](#).

Identification method to distinguish the change:

Product Change Index printed on type label, see appendix. Firmware revision could be read out electronically.

Qualifiable impact on quality and reliability:

No impact on form and fit.

Samples: available will be available soon not applicable

Proposed first ship date¹:	01.08.2025
Last time order for devices:	Not applicable
Last time ship for devices:	Not applicable
End of Repair-Service for devices:	Not applicable
End of Support for devices:	Not applicable

Proemion contact: sales-team@proemion.com

¹ The proposed first ship date is the forecasted date that a customer may expect to receive changed products. This is determined by the estimated date of inventory depletion on the PCN issue date. This may be affected by fluctuations in supply and demand. Consequently, although customers should be prepared to receive changed products on this date, Proemion will continue to ship pre-changed products until a time in which the inventory has been depleted. This may result in pre-changed products being shipped to customers after this forecasted date.
